Professional Summary

A recent graduate Information Technology with hands-on experience building and deploying backend-driven web applications, REST APIs, and database driven systems using Laravel, Node.js, MySQL and cloud infrastructure. Proven track record shipping full-stack systems end-to-end, from schema design and API architecture to cloud deployment and performance optimization. Strong foundation in authentication, role-based access control, and real-time integrity.

Professional Experience

DPWH Virac

Feb 2026 – June 2026

IT Support & Maintenance Intern

Catanduanes, Philippines

- Assisted in domain configuration, workstation networking, and system troubleshooting across multiple department offices.
- Performed preventive maintenance and technical support for computers, printers, and office systems, reducing hardware downtime by 40%
- Assisted in organizing and maintaining technical documentation and system-related records.

Web Developer

May 2023 – Nov 2025

Freelance

Catanduanes, Philippines

- Architected and deployed server-side web applications for 5+ clients using PHP/Laravel and MySQL on cloud hosting environments.
- Built reusable backend modules and API integrations, cutting average project delivery time by **25%**.
- Implemented responsive frontends as part of full-stack deliverables, primary value delivered through backend logic and database designs.

Projects

Personal Portfolio + AI Chatbot | *Next.js – Supabase – Vercel AI SDK* | [Live URL](#) | [GitHub](#)

2026

- Built backend API layer using Typescript and Node.js, integrating Supabase as the primary database and auth provider.
- Integrated an AI chatbot via Vercel AI SDK to automate visitor inquiry handling, reducing manual response workload by 70%.

Bestie Coffee Café System | *LAMP Stack – MySQL – Cloud Deployment*

2026

- Deployed a centralized cafe management system on a cloud-based LAMP stack.
- Configured MySQL database synchronization for real-time inventory and sales reporting.

Employee Management System | *Laravel – MySQL – JWT Auth* | [GitHub](#)

2025

- Built a Laravel-based backend for employee onboarding, status tracing, and department hierarchies with a normalized MySQL database schema.
- Implemented JWT and session-based authentication with role-based access control, restricting sensitive salary and personal data to authorized HR roles.
- Designed RESTful routes and controller logic for CRUD operations across employee records, departments, and access controls.

Education

Catanduanes State University

Aug 2022 – June 2026

Bachelor of Science in Information Technology | **1.4 GWA (Cum Laude)**

Catanduanes, Philippines

- **Dean's Lister (2022-2023 | 2024-2026)**

Certifications & Courses

Backend & Cloud: Web Development (Laravel), Oracle Cloud AI Associate, GitHub Foundations

Security: Junior Cybersecurity Analyst Career Path (CISCO)

AI & Product: Prompt Engineering (IBM), GenAI (Google), UX Design (IBM), Technical Support (Google)

Technical Skills

Backend: PHP, Laravel, Node.js, REST APIs, JWT Auth, Webhooks, MVC Architecture

Database: MySQL, Supabase, Firebase

DevOps & Tools: Git, GitHub, Vercel, Cloud Lamp stack deployment, CI/CD pipelines, Postman

Programming Languages: PHP, Javascript, Python, Java, SQL

Communication: English, Filipino (Native)
